
FREE PROMPT PACK · THE ARTIFICIAL ADVANTAGE

50 Best AI Prompts

For the jobs that eat your week, organized by the work each one does.

ELVIN M. PETERS · author of The Artificial Advantage

START HERE

How to use this pack

Every prompt here is a short brief. It tells the AI who to be, what to produce, and the limits the answer has to fit. My book, *The Artificial Advantage*, calls that structure RTC: Role, Task, Constraint. The brackets are where your details go, and your details turn a general answer into one written for your situation.

PROMPT 01, FILLED IN

Act as a professional business writer. **ROLE** Here is an email I received: "Hi Sam, could we move Thursday's design review to next week? The team needs a few more days on the mockups." Write a reply that agrees to the move, offers two times on Tuesday or Wednesday, and asks for the mockups the day before. **TASK** Under 100 words. Tone: warm but efficient. **CONSTRAINT**

The template asks for a reply that acknowledges the main point, answers the question and gives one next step. The filled-in version names what this particular reply has to do. The task is where most weak prompts fail, so it's the part to spend your effort on.

1

Replace every bracket

A bracket left in is a detail the AI has to guess, and it fills gaps with the most likely average.

2

One job per message

If you need a summary and an email, ask for the summary first, then the email.

3

Treat the first answer as a draft

Give one specific note, such as "shorter," "warmer" or "add an example from our industry," and run it again.

Check before it leaves your desk

Names, numbers, dates and anything stated as fact. Several prompts here ask the AI to mark its guesses, which makes the checking faster.

Where they work

Any chat assistant: ChatGPT, Claude, Gemini or Copilot. Start a new chat for each prompt, so an earlier conversation doesn't steer the answer.

CONTENTS

Fifty prompts, ten jobs

Each section has five prompts and ends with a follow-up note you can send after any of them.

01	Writing & Communication	4
	Emails, messages and proposals, where the wording decides how it lands.	
02	Marketing & Growth	6
	Customers, campaigns, positioning and copy.	
03	Sales & Persuasion	8
	Outreach, objections and the close.	
04	Data & Analysis	10
	Making sense of numbers when data isn't your day job.	
05	Strategy & Decision-Making	12
	Tradeoffs, risks and thinking clearly before a big call.	
06	Productivity & Planning	14
	Planning the week, handing off work and running fewer meetings.	
07	HR & People Management	16
	Hiring, feedback and the documents that shape a team.	
08	Finance & Business Operations	18
	Numbers, forecasts and the decisions they drive.	
09	Learning & Research	20
	Getting up to speed fast, and knowing which parts to check.	
10	Content Creation	22
	Ideas, drafts and formats for posts, videos and newsletters.	

Writing & Communication

Emails, messages and proposals, where the wording decides how it lands.

01 The Inbox Killer

Act as a professional business writer. Here is an email I received: [PASTE EMAIL]. Write a reply that acknowledges their main point, answers their question directly, and gives one clear next step. Under 100 words. Tone: warm but efficient.

Best for: The reply you've put off because the answer is easy and the wording isn't.

02 The Hard Conversation Draft

Act as an experienced manager known for being direct and fair. Help me write a message to [RECIPIENT, for example a client who missed a payment or a team member whose work has slipped]. My goal: [OUTCOME, for example fix the issue without damaging the relationship]. Key facts: [2 OR 3 BULLET POINTS]. Write a message that is direct and professional and leaves the door open to a solution. Describe what happened without guessing at their reasons. Under 150 words.

Best for: Late payments, slipping work and client conflict you'd rather not put off.

03 The Proposal Polisher

Act as an editor who has read hundreds of business proposals. Here is mine: [PASTE PROPOSAL]. Improve it in three ways: a stronger opening, a clearer statement of what the client gets, and tighter language with the filler cut. Return the revised version, then a short note on each change and why you made it. Keep every fact and number as I wrote it.

Best for: Client pitches, grant applications and partnership decks, before they go out.

04 The Tone Translator

Act as a communications specialist. Rewrite the text below in a [FORMAL / CASUAL / PERSUASIVE / EMPATHETIC] tone for [AUDIENCE, for example senior executives or first-time customers]. Keep the facts and the core message; change only the tone and style, and keep it about the same length. Text: [PASTE TEXT]

Best for: Sending one message to two very different audiences.

05 The Meeting Summary

Act as a chief of staff. Turn my rough meeting notes into a summary for people who weren't there: [PASTE NOTES]. Use three sections: decisions made, action items with an owner and a deadline, and open questions for next time. Keep it under 250 words, and flag any action item that has no owner.

Best for: Recaps after a meeting, and updates for the people who missed it.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Now read this as [THE RECIPIENT]. Cut anything that doesn't help them decide what to do, and move the ask into the first two sentences."

Marketing & Growth

Customers, campaigns, positioning and copy.

06 The ICP Builder

Act as a marketing strategist. I run a [TYPE OF BUSINESS] that sells [PRODUCT OR SERVICE] to [GENERAL AUDIENCE]. Build an ideal customer profile covering who they are (people or company profile), their job titles and who signs off on the purchase, their top three problems, what triggers a purchase, and where they spend time online. Use bullet points, and mark anything that's a guess I should confirm with real customers.

Best for: Before you launch ads, rewrite your targeting or brief a new marketing hire.

07 The Ad Angle Generator

Act as a direct-response copywriter. I'm running paid ads for [PRODUCT OR SERVICE] aimed at [AUDIENCE]. Give me 10 ad angles, each built on a different motivation: fear of missing out, social proof, curiosity, time saved, money saved, transformation, authority, simplicity, exclusivity and urgency. For each angle, write a one-sentence hook. Only use claims I can back up: [WHAT'S TRUE ABOUT THE OFFER].

Best for: Creative testing on Google, Meta or LinkedIn.

08 The Competitor Gap Finder

Act as a positioning strategist. I compete with [COMPETITOR NAMES] in [INDUSTRY]. Based on the complaints customers commonly raise in this category (slow service, high cost, weak support and so on), identify five positioning gaps I could fill. For each gap, suggest one specific message that sets my offer apart. Say which gaps rest on assumptions, so I can check them against real reviews.

Best for: Positioning work, sales talking points and landing page copy.

09 The Landing Page Audit

Act as a conversion copywriter. Here is my landing page copy: [PASTE COPY]. Audit it against five points: a headline that states the benefit, one main call to action near the top, proof that is present and specific, objections answered before the reader raises them, and a real reason to act now. Score each point from 1 to 10 and give one specific improvement for each.

Best for: A review before launch, or a page that gets visits and no sign-ups.

10 The Email Subject Line Factory

Act as an email marketer. Write 20 subject lines for a campaign promoting [OFFER OR TOPIC] to [AUDIENCE]. Mix the formats: curiosity (5), specific benefit (5), question (3), deadline (3), social proof (2) and personal (2). Keep each under 50 characters and label its format. Leave out anything I couldn't stand behind if a reader asked.

Best for: Newsletters, product launches and email sequences.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Rank these from strongest to weakest for [AUDIENCE], with one line on why, and rewrite the weakest two."

Sales & Persuasion

Outreach, objections and the close.

11 The Cold Outreach Writer

Act as a sales rep who writes short, specific emails. Write a first email to a [JOB TITLE] at a [TYPE OF COMPANY]. My offer: [ONE SENTENCE]. Their likely problem: [PROBLEM]. Under 80 words. Skip the generic opener and lead with one specific observation about their business. End with a small, easy ask, such as a question they can answer in one line.

Best for: Sales outreach, partnership pitches and freelance pitches.

12 The Objection Crusher

Act as a sales coach. A prospect said: "[THE OBJECTION, WORD FOR WORD]". I sell [PRODUCT OR SERVICE] at [PRICE]. Give me three responses: one that reframes the cost, one that uses proof from a real customer ([PASTE A REAL RESULT OR REVIEW]), and one that speaks to the worry behind the objection. Each under 50 words, in plain spoken language.

Best for: "Too expensive," "not right now" and "I need to think about it."

13 The Follow-Up Sequence

Act as a sales rep who follows up without being pushy. A prospect went quiet after [LAST CONTACT, for example a demo call or a proposal]. Write four follow-up emails spread over three weeks: first, something useful for them; second, a real customer result ([PASTE ONE]); third, an answer to a likely objection; fourth, a polite email that closes the loop. Each under 80 words.

Best for: Deals that went quiet, trials that stalled and proposals with no reply.

14 The Discovery Question Bank

Act as a consultative sales trainer. I sell [PRODUCT OR SERVICE] to [AUDIENCE]. Write 15 discovery-call questions that find the real problem, put a cost on it, map the decision process and timeline, and surface competing priorities. Group them under those four goals and mark the five I should ask on every call.

Best for: Preparing for a sales call, or training a new rep.

15

The Proposal Closer

Act as a senior account director. I'm writing the closing section of a proposal for [CLIENT OR CLIENT TYPE], and the deal is worth [AMOUNT]. Write three short paragraphs: what changes for them once this is done, answers to their two most likely hesitations ([LIST THEM IF YOU KNOW THEM]), and a specific next step with a date. Confident and plain, with no pressure tactics.

Best for: Agency proposals, consulting scopes and B2B deals.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Rewrite this so it sounds like a person talking on the phone, and remove any line a busy buyer would roll their eyes at."

Data & Analysis

Making sense of numbers when data isn't your day job.

16 The Data Storyteller

Act as an analyst who presents to executives. Here are the numbers: [PASTE DATA OR KEY METRICS]. I'm presenting them to [AUDIENCE, for example the leadership team or a board]. Write a short narrative that opens with the most important finding, explains what's driving it, and recommends one action. Plain language, no jargon, under 200 words. Use only the numbers I gave you.

Best for: Board updates, monthly reviews and investor notes.

17 The KPI Dashboard Designer

Act as an operations analyst. I run a [TYPE OF BUSINESS]. Propose a dashboard of the eight metrics that matter most for [DEPARTMENT OR FUNCTION]. For each one, give its name, a one-line definition, the decision it informs, and how often to check it (daily, weekly or monthly). Suggest a target range only where a common rule of thumb exists, and label it as a rule of thumb.

Best for: Building a dashboard in Sheets, Notion or Looker.

18 The Spreadsheet Formula Builder

Act as a spreadsheet expert. I'm using [GOOGLE SHEETS / EXCEL]. I need a formula that [DESCRIBE WHAT IT SHOULD DO, IN PLAIN ENGLISH]. My data: [DESCRIBE THE COLUMNS, for example column A has dates, column B has revenue, column C has product names]. Give me the formula, explain each part in one line, and list the cases that could break it, such as blank cells or text in a number column.

Best for: Anyone who avoids spreadsheets because formulas feel like a foreign language.

19 The Root Cause Analyst

Act as a business analyst. Our [METRIC, for example churn, cost per acquisition or conversion rate] moved from [OLD VALUE] to [NEW VALUE] over [TIME PERIOD]. Changes in that period: [LIST CHANGES: campaigns, team, product, market]. Use the 5 Whys to find the most likely root cause, then suggest three ways to test it or fix it. Say which explanations the data supports and which are guesses.

Best for: Post-mortems, sudden dips and explaining a change to leadership.

Act as a research designer. I want to survey [AUDIENCE] to understand [RESEARCH GOAL]. Write 10 questions that avoid leading language, mix rating scales with open-ended questions, and run from broad to specific. The whole survey should take under five minutes. Give the answer format for each question (multiple choice, scale or open text).

Best for: Customer research, employee feedback and testing a product idea.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"List the assumptions you made about this data, and tell me which conclusion changes most if one of them is wrong."

Strategy & Decision-Making

Tradeoffs, risks and thinking clearly before a big call.

21 The Devil's Advocate

Act as a skeptical board member. I'm planning to [DECISION OR PLAN]. Give me the five strongest arguments against it, covering business risk, execution risk, market risk and timing. For each one, suggest how I could reduce the risk. Be blunt: I want the case against, stated as strongly as you can.

Best for: Big hires, product bets, price changes and new markets.

22 The Prioritization Matrix

Act as a strategy consultant. Here are the initiatives I'm weighing: [LIST 5 TO 10 PROJECTS]. Score each on revenue impact, effort and strategic fit (high, medium or low) and on time to results (fast, medium or slow). Show it as a table, then recommend the three to start first, with one line of reasoning for each.

Best for: Quarterly planning, roadmap reviews and budget decisions.

23 The Pre-Mortem

Act as a project risk advisor. Imagine it's [DATE 12 MONTHS FROM NOW] and [PROJECT] has failed. Describe the most likely reasons, covering people, execution, the market and our assumptions, ranked from most to least likely. Then give me three things to do in the next 30 days to lower those risks.

Best for: Launches, big hires and funding decisions.

24 The Second-Order Thinker

Act as a strategic advisor. I'm considering [DECISION, for example cutting prices by 20 percent or moving to remote-first]. Walk me through the second- and third-order consequences, and mark each one positive, negative or uncertain. Keep it specific to my situation: [2 OR 3 SENTENCES ABOUT YOUR BUSINESS].

Best for: Pricing, reorganizations, partnerships and changes of direction.

Act as a strategy lead writing for a skeptical executive. Draft a one-page brief for [INITIATIVE] covering the problem and the cost of waiting, the proposed solution in two sentences, how we'll measure success, the resources needed, the risks and assumptions, and the timeline. Under 400 words.

Best for: Getting buy-in, asking for budget and aligning a team.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Which of these points are you least sure about, and what would I need to find out to check each one?"

Productivity & Planning

Planning the week, handing off work and running fewer meetings.

26 The Week Planner

Act as an executive assistant who protects focus time. My priorities this week: [LIST 5 TO 10 ITEMS]. My constraints: [AVAILABLE HOURS, FIXED MEETINGS, WHEN MY ENERGY IS HIGHEST]. Build a Monday-to-Friday schedule that protects blocks for deep work, batches small tasks and leaves one buffer block each day. Format it as a table.

Best for: Sunday planning, and task lists that feel too long.

27 The SOP Builder

Act as an operations manager. Write a standard operating procedure for [TASK OR PROCESS]. The person following it is [ROLE, for example a new hire or an assistant]. Use numbered steps. For each step, give the action, the tool to use, what a good result looks like, and what to do if something goes wrong. Plain language, with clarity ahead of polish.

Best for: Recurring tasks you want to hand off, and onboarding.

28 The Meeting Eliminator

Act as a team lead who runs a tight calendar. Here's a meeting on my calendar: [MEETING NAME AND PURPOSE]. Rewrite it as an update I can send instead, with a short context paragraph, the questions that need answers (with a deadline), what the team needs to know, and next steps. Format it to paste into Slack, Teams or email.

Best for: Status updates and check-ins that don't need everyone in the room.

29 The Delegation Packager

Act as an experienced manager. I need to hand [TASK] to [ROLE OR PERSON]. Write a delegation brief covering what a good result looks like, what they shouldn't decide without checking with me, the resources and access they need, the deadline and check-ins, and how to ask for help. Make it clear enough that I won't need to explain it twice.

Best for: Handing work to an assistant, a new hire or a contractor.

30 The 90-Day Plan

Act as a career coach. I'm a [ROLE] at a [TYPE OF COMPANY], and my top goal for the next 90 days is [GOAL]. Build a 90-day plan: month one to learn and set up, month two to build and execute, month three to improve and deliver. Give three weekly priorities for each month and one measurable milestone at the end of each month.

Best for: A new role, a new project or a reset after a slow quarter.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Cut this plan by a third. Keep only what I'd miss if it were gone, and tell me what you removed."

HR & People Management

Hiring, feedback and the documents that shape a team.

31 The Job Description Writer

Act as a recruiter who writes job posts that candidates read to the end. Write a job description for a [JOB TITLE] at a [TYPE OF COMPANY]. The role is responsible for [3 KEY OUTCOMES]. Required skills: [LIST]. Nice to have: [LIST]. Pay: [RANGE]. Include a short section on why a strong candidate would want this job. Under 400 words.

Best for: Attracting stronger applicants, and fewer unqualified ones.

32 The Interview Question Bank

Act as a hiring manager trained in structured interviews. I'm hiring a [JOB TITLE], and the trait I most need to assess is [TRAIT, for example ownership, coachability or strategic thinking]. Write 10 behavioural questions that draw out evidence of this trait. For each one, describe what a strong answer and a weak answer sound like.

Best for: Structured interviews, and training new hiring managers.

33 The Performance Review Writer

Act as an HR business partner. I'm writing a performance review for a [EMPLOYEE ROLE]. My notes: [BULLET POINTS: achievements, areas to improve, behaviours]. Write a review summary with strengths (a specific example for each), development areas framed as next steps, and goals for the next review period. Fair and professional, using only the examples in my notes.

Best for: Annual reviews, mid-year check-ins and documenting a performance plan.

34 The 1:1 Agenda Builder

Act as a management coach. I manage a [ROLE]. Build a repeatable 1:1 agenda with four parts: their wins and blockers this week, feedback I can give, a check-in on their development goal, and open items. Give two or three questions for each part. The whole meeting should fit in 30 minutes.

Best for: Keeping 1:1s consistent, and new managers running their first ones.

Act as a people-operations lead. Help me write a culture document for [COMPANY OR TEAM]. Our values: [LIST 3 TO 5 VALUES]. For each value, define what it means in practice and give one example of someone living it and one of someone breaking it. Then write a two-paragraph "who we are" section a new hire would read on day one. Direct and plain, with no corporate filler.

Best for: Growing teams, onboarding and writing down how you already work.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Check this for anything that could read as unfair or vague to the person receiving it, and suggest a fix for each."

Finance & Business Operations

Numbers, forecasts and the decisions they drive.

36 The Unit Economics Calculator

Act as a finance analyst. Calculate the unit economics for my business from these inputs: monthly revenue per customer [AMOUNT], cost to acquire a customer [AMOUNT], monthly churn [PERCENT], gross margin [PERCENT]. Work out lifetime value, the LTV to CAC ratio, the payback period and the contribution margin. Show each formula with my numbers in it so I can check the math, then tell me what the results suggest and what to improve first.

Best for: Investor conversations, pricing decisions and growth planning.

37 The Budget Variance Explainer

Act as a financial controller. My [PERIOD] budget for [CATEGORY] was [AMOUNT], and actual spend was [AMOUNT]. The line items over or under: [LIST]. Write a variance explanation for [STAKEHOLDER, for example the CFO or the board] that names the causes, separates what was in our control from what wasn't, and states the fix for next period. Under 250 words.

Best for: Month-end reporting, board updates and budget reviews.

38 The Pricing Strategy Advisor

Act as a pricing consultant. I sell [PRODUCT OR SERVICE]. Current pricing: [PRICE AND STRUCTURE]. My costs: [COST STRUCTURE]. Competitors charge: [COMPETITOR PRICING]. Tell me whether I look underpriced, overpriced or well placed, which pricing model fits best (flat, tiered, usage-based or value-based) and why, and one change I could make, with a note on how to explain it to existing customers.

Best for: Price reviews, launches and renewals.

39 The Vendor Negotiation Prep

Act as a procurement negotiator. I'm renewing a contract with a [VENDOR TYPE] that charges [AMOUNT] for [WHAT]. I want to reach [TARGET PRICE OR TERMS]. My bargaining points: [LIST, for example years as a customer, on-time payment, alternatives we're considering]. Write a short negotiation plan and the opening line I should use.

Best for: Software renewals, supplier talks and agency retainers.

Act as a financial planning analyst. Current monthly revenue: [AMOUNT], growing [RATE] a month. Fixed costs: [AMOUNT] a month. Variable costs: [PERCENT] of revenue. Build three cash flow scenarios for the next six months: conservative (growth slows by half), base (the current path) and optimistic (growth rises by half). Show each month in a table, mark the month where cash is tightest, and suggest what to do before it arrives.

Best for: Fundraising prep, seasonal planning and keeping an eye on burn.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Show the math for every number in a table so I can check it, and flag any input you had to assume."

Learning & Research

Getting up to speed fast, and knowing which parts to check.

41 The Expert Explainer

Act as a patient teacher who explains technical ideas to busy professionals. Explain [COMPLEX TOPIC] to me as a [ROLE, for example a marketing manager or a small business owner] with no background in it. Use an analogy from my world. Cover what it is in one sentence, what it changes for someone like me, the one thing I need to know to use it well, and the most common misunderstanding.

Best for: Learning a new topic fast, or preparing for a meeting.

42 The Book Summarizer

Act as a research assistant. Here are my notes and highlights from [BOOK TITLE] by [AUTHOR]: [PASTE NOTES]. Using them, pull out the five most useful ideas for [MY CONTEXT, for example running a small business], the one idea that runs against common advice, and one thing I could try this week. Label anything you add that isn't in my notes, so I can check it.

Best for: Turning a book you've read into something you use.

43 The Research Briefing

Act as a research analyst. I need to get up to speed on [TOPIC OR INDUSTRY], and I have [TIME AVAILABLE, for example 20 minutes]. Give me the five most important things to know, the two biggest debates among people who work in this field, and five questions I should be asking. Then list the claims I should verify before I repeat them. If your tool can search the web, turn search on and cite your sources.

Best for: Meeting prep, industry research and a first pass before deeper work.

44 The Skill Accelerator

Act as a learning coach. I want to learn [SKILL] in [TIMEFRAME, for example 30 days]. My level: [BEGINNER / SOME EXPERIENCE]. My goal: [SPECIFIC OUTCOME, for example run my own ad campaigns]. Build a daily plan with what to study, what to practise and how to measure progress, realistic for [HOURS] a week. Where you aren't sure a specific resource exists, describe the kind of resource to look for.

Best for: Upskilling, a career change or ramping up in a new area.

45 The Assumption Challenger

Act as a sharp outside advisor. Here's something I believe about my business or market: [STATE THE BELIEF]. Challenge it. Give me evidence it might be wrong, who benefits from me believing it, what I'd do differently if it turned out to be false, and one simple test I could run to check it.

Best for: Before a change of direction, a new market or a product bet.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Mark each claim in your answer as confident, likely or check this, and tell me what would confirm the ones marked check this."

Content Creation

Ideas, drafts and formats for posts, videos and newsletters.

46 The LinkedIn Post Engine

Act as a ghostwriter for professionals on LinkedIn. Write a post about [TOPIC OR EXPERIENCE]. Open with a line that makes a specific point, with no clichés and no "I'm excited to share." Follow with three to five short paragraphs built on one real insight or story, and end with a question that invites replies. Direct and human, as if talking to a peer. Under 200 words, with at most two hashtags.

Best for: Posting about your work on LinkedIn, in your own voice.

47 The Content Calendar Builder

Act as a social media strategist. Build a four-week content calendar for [PLATFORM] for a [TYPE OF BUSINESS OR CREATOR], posting [TIMES PER WEEK]. Mix educational posts (40 percent), behind the scenes (20 percent), promotional (20 percent) and questions that invite replies (20 percent). For each post, give the topic, the format and a one-sentence brief.

Best for: Planning a month of posts in one sitting.

48 The Video Script Outline

Act as a video producer. Outline a [YOUTUBE / TIKTOK / REELS] video about [TOPIC], about [LENGTH] long. Include a hook in the first five seconds that gives a reason to keep watching, a short setup, three main points, one surprise or change of pace near the middle, and a call to action at the end. Return a time-stamped outline and leave the full script for later.

Best for: Planning YouTube videos and Shorts, or turning a post into a video.

49 The Newsletter Issue Writer

Act as a newsletter writer. Write an issue about [TOPIC] for [DESCRIBE READERS]. 400 to 500 words, in this order: an opening hook or personal angle, the main insight or story, one practical takeaway they can use this week, and one recommendation (a tool, an article or a resource). Tone: a smart friend sharing something useful. Use only the facts in my notes: [NOTES].

Best for: Weekly newsletters, and keeping an email list warm.

Act as a content editor. Here's something I made: [PASTE A BLOG POST, PODCAST TRANSCRIPT OR VIDEO SCRIPT]. Turn it into one LinkedIn post (about 150 words), one X thread (five posts), three hooks for short videos (about 10 seconds each), one newsletter paragraph and one Instagram caption. Keep the core idea the same across all of them, and adjust the tone for each platform.

Best for: Getting five pieces out of one piece of work.

SECOND PASS

Send this after any prompt in this section, once the first draft is back:

"Give me three different openings for this, and make the last one unexpected."

Keep the ones that work

When a prompt from this pack gets you something you'd use again, save your filled-in version where you'll find it next week: a note, a doc, or your AI tool's saved instructions. Next time you only change the details. A handful of saved briefs for the work you repeat every week is how this turns from a trick into a habit.

THE METHOD BEHIND THESE PROMPTS

The Artificial Advantage

My book teaches the method these prompts are built on, in five stages: choose the right tool for the job, lead with clear direction, improve a draft with precise notes, check what matters before it goes out, and repeat what works until it's a habit.

See the book at elvinpeters.com/book.html

Elvin M. Peters is a marketer who taught himself to build with AI. For most of a decade he ran performance marketing at scale, and he wrote *The Artificial Advantage* to help professionals get better work out of AI. elvinpeters.com
