50 Best AI Prompts

*The exact prompts professionals use to save 10+ hours a week
— organized by job, task, and outcome.*

By **Elvin Peters** · Author of **The Artificial Advantage**

How to Use This Guide

Most people use AI wrong. They type vague requests and get vague answers. Then they blame the tool.

The professionals pulling real ROI from AI share one habit: **they prompt with context, role, and outcome**. The prompts in this guide are built on that formula.

Inside you'll find 50 prompts across 10 categories:

- Writing & Communication
- Marketing & Growth
- Sales & Persuasion
- Data & Analysis
- Strategy & Decision-Making
- Productivity & Planning
- HR & People Management
- Finance & Business Operations
- Learning & Research
- Content Creation

Pro tip: Every prompt has a bracketed placeholder like [TOPIC] or [COMPANY]. Swap these with your real details before running. The more specific you are, the better the output.

These prompts work in ChatGPT, Claude, Gemini, or any LLM. The model matters less than the quality of the prompt.

Let's go.
